# Caring for the environment

- Energy saving precautions are taken and low energy equipment are used in all departments and units.
- Recycled material is preferred in wherever applicable.
- No hazardous chemicals are used in any stage of lacquering and epoxy coating.
- All dyes and paints used in the production are water based and soluble.
- All the wastes from any stage of the production are separated and disposed in 25 different categories.
- One biological and one chemical filtering system is operating within the factory.
- All wastes are collected by expert companies registered to the Ministry of Environment in line with regulations.

# Respecting nature

We make sure that our designs are long-lasting, respectful to nature and reusable. In our production, we minimize our waste with nature-friendly business processes and reduce our carbon footprint.

We use recycled and/or recyclable materials always caring about the sustainability of global resources.
